It's all about Personal Branding

01

The LinkedIn profile page is the foundation for your personal branding

02

When we neglect personal branding, we don't just sell ourselves short – we also miss a big opportunity from a marketing perspective

03

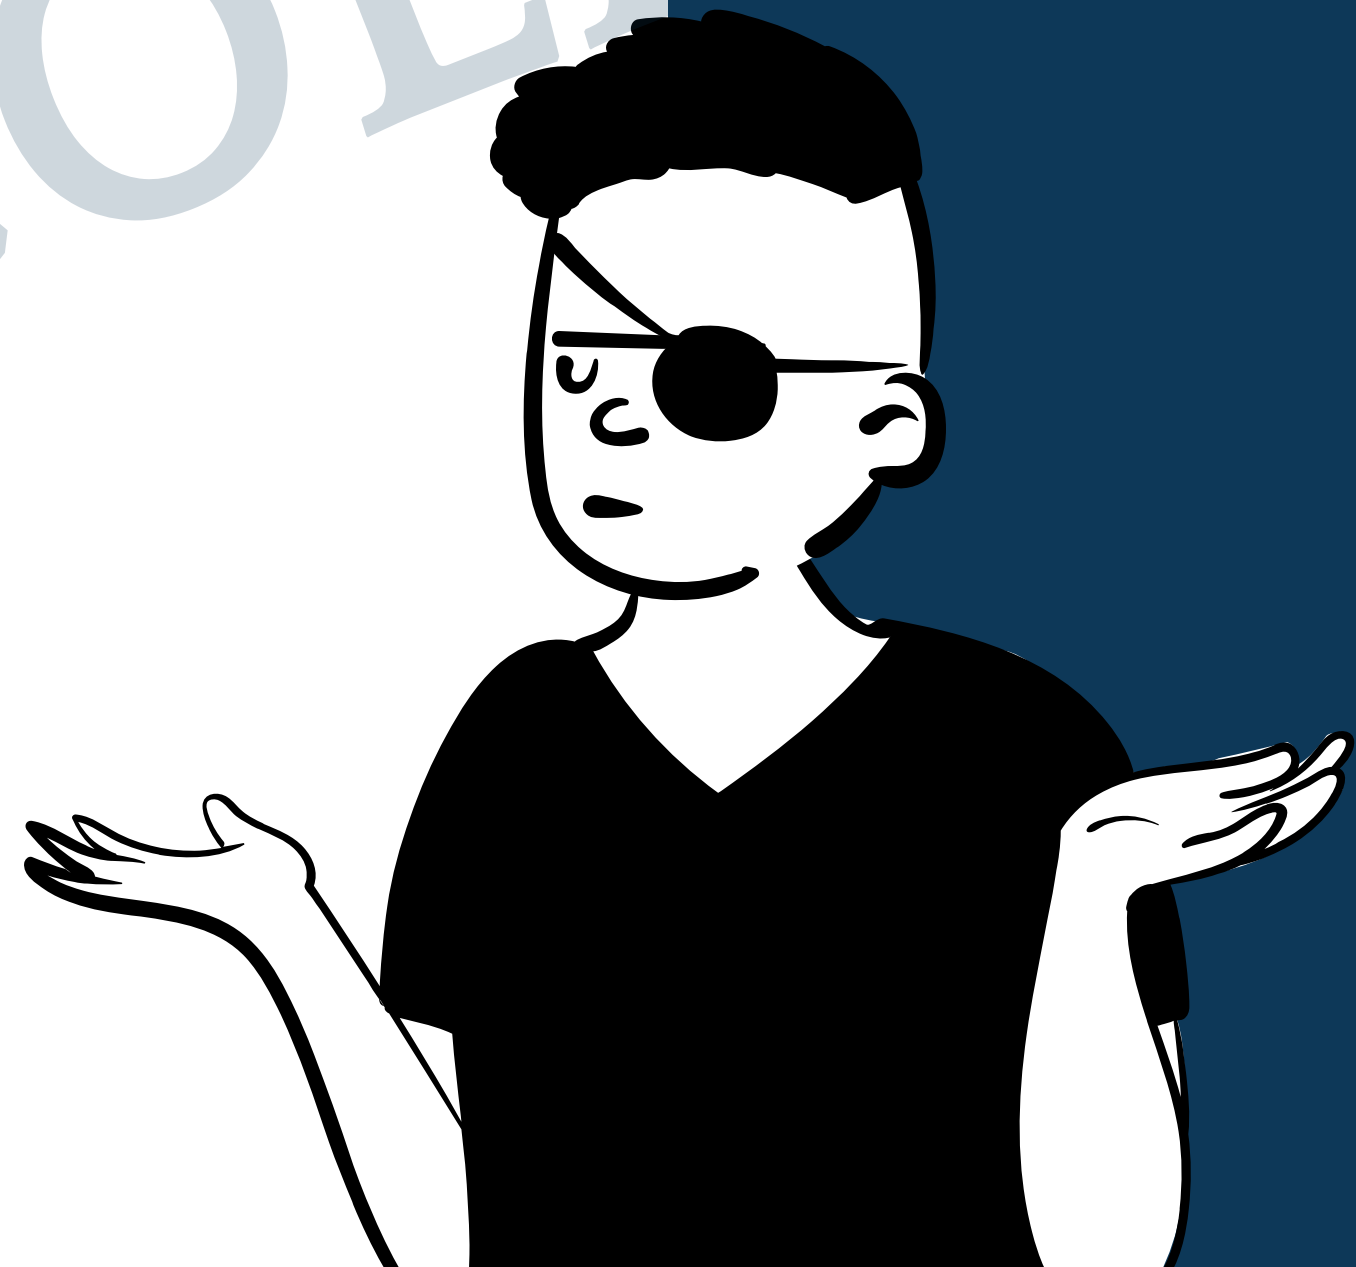

The impact of employees who share content is huge. And the most effective employee sharers are those who've built their personal brand on LinkedIn.

What is Personal Branding?

Personal branding is what other people think of you when you are not in the room.

At online platforms, it is what people think of you when they see your profile for the first time.
